

CathPrint AB is looking for a Junior engineer to join our team in Stockholm

We are looking for someone who is passionate about technology development, and would excel in a role where responsibility and the opportunity to impact the company's success is in focus. As we are a small team, every role is integrated in the entire business and covers several areas; collaboration skills and interest in learning are essential for the team to run with high quality and effectiveness.

The Position

In this position, you will be in the center of our R&D work, and your work will have a direct impact on the company's performance. You will have a dynamic role, working both in the office and hands-on in the lab.

Tasks include:

- Product development, including documentation of progress and findings (according to our QMS)
- Design of electronic circuits, both internal projects and customer projects
- Prototyping and R&D work in the lab
- Medical device basic testing (e.g. electrical)
- Supplier and customer contacts

We are looking for someone who is recently graduated or has a few years' experience, and who is ready to grow in the role as it develops. The position is located at our facilities in Kista.

Basic qualifications

BSc in mechanical engineering, electrical engineering, material science, or related field

Knowledge of CAD

Fluency in English

Preferred qualifications

MSc preferred with technology focus

Knowledge of medical device development process and ISO13485

Knowledge of testing/validation of devices

Knowledge in electrical engineering and electronics design

Applications are sent to career@cathprint.se

Candidates are interviewed continuously; starting date summer 2020.
